AGENDA/DISCUSSION SUMMARY

Started brainstorming a project. Had ideas for a class schedule project and several games. Decided to go with a game because no one had really done a game before. We wanted it to be fairly simple, so we decided upon a card game of some sort.
We didn't have a specific card game in mind, but we thought it would be cool if we could make a card game framework of some kind that would allow players to make their own rules.

We then began discussing what platform and language we wanted the game to be on. The initial idea was a client in Java Swing that would send turn updates to a server, where those would propagate out to the other players in that game. Eventually the idea moved to something that was completely web-based instead. The talk moved to our screen sketches assignment and deciding who was going to do what, which is the topic for the next meeting.

	STUDENT NAME (INITIALS)	NEW ACTION ITEM	DUE DATE
1	JK	Start on game settings, home page and screen flow	Feb 1st
2	BA	Start on the Account and Lobby screens	Feb 1st
3	TL	Start on the Login and Register screens	Feb 1st
4	AU	Start on the main game and chat screens	Feb 1st
